

# ABRASIVE FLAP ROLLS

Flap Rolls have a wide profile (up to 4") which make them an ideal accessory for finishing large surface areas with portable finishing tools. Their rotation provides a grained, or linear surface finish, as opposed to the swirl pattern produced by discs. Common applications include stainless steel panels, cabinets and food preparation equipment.

## Abrasive Flap Rolls

Made with premium Aluminum Oxide grain on an X-weight backing for general deburring, cleaning, and finishing applications on carbon and stainless steels. Available in grits 40-320.

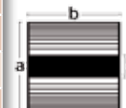

**TIP:** Flap Rolls are designed for specialized finishing tools which are rated at 5000 RPMs or lower and are properly guarded. They should never be adapted to other tools. For more information on tool selection, please contact Wendt's customer service.

Also available with 5/8-11 thread

## Interleaf Finishing Flap Rolls

Alternating flaps of Aluminum Oxide coated abrasive and Nonwoven material produce a brushed surface finish. The coated abrasive makes the product slightly more aggressive than a nonwoven roll (see below) for light finishing and deburring.

**TIP:** Nonwoven and Interleaf Rolls should always be run at lower speeds than coated abrasives. This will extend the roll life and improve finish.

## Felt Polishing Flap Rolls

Use in combination with a buffing or polishing compound to produce up to a mirror finish.  
Made from 70% wool felt.
